2024_28_III_OOPS Using Java Lab

REC_2028_OOPS using Java_Week 8_MCQ

Attempt : 1
Total Mark : 15
Marks Obtained : 15

Section 1 : MCQ

1. Which keyword is used to explicitly throw a custom exception?

Answer

throw

Status : Correct   *Marks : 1/1*

2. What is the purpose of a custom exception in Java?

Answer

To create user-defined exceptions for specific scenarios

Status : Correct   *Marks : 1/1*

3. What will be the output for the following code?

```java
import java.io.*;

class NegativeAgeException extends Exception {
    public NegativeAgeException(String message) {
        super(message);
    }
}

class Test {
    public static void main(String[] args) {
        try {
            int age = -5;
            if (age < 0) {
                throw new NegativeAgeException("Age cannot be negative");
            }
        } catch (NegativeAgeException e) {
            System.out.println(e.getMessage());
        }
    }
}
```

Answer

Age cannot be negative

Status : Correct   *Marks : 1/1*

4. How do you create an unchecked custom exception?

Answer

By extending RuntimeException

Status : Correct   *Marks : 1/1*

5. What will be the output for the following code?

import java.io.*;

```java
class UnderageException extends Exception {
    public UnderageException(String message) {
        super(message);
    }
}

class Test {
    public static void main(String[] args) {
        try {
            int age = 17;
            if (age < 18) {
                throw new UnderageException("Underage, cannot proceed");
            }
        } catch (UnderageException e) {
            System.out.println(e.getMessage());
        }
    }
}
```

Answer

Underage, cannot proceed

Status : Correct   *Marks : 1/1*

6. What will happen if a checked custom exception is thrown inside a method without being caught or declared?

Answer

Compilation Error

Status : Correct   *Marks : 1/1*

7. What will be the output for the following code?

import java.io.*;

class OutOfStockException extends Exception {

```java
    public OutOfStockException(String message) {
        super(message);
    }
}

class Test {
    public static void main(String[] args) {
        try {
            int stock = 0;
            if (stock == 0) {
                throw new OutOfStockException("Item is out of stock");
            }
        } catch (OutOfStockException e) {
            System.out.println(e.getMessage());
        }
    }
}
```

Answer

Item is out of stock

Status : Correct   *Marks : 1/1*

8. what is the output of the following code?

```java
class MyException extends Exception {
    public MyException(String message) {
        super(message);
    }
}

class Test {
    public static void main(String[] args) {
        try {
            throw new MyException("Error occurred");
        } catch (MyException e) {
            System.out.println(e);
        }
    }
}
```

}

Answer

MyException: Error occurred

Status : Correct   *Marks : 1/1*

9. What will be the output for the following code?

```
class NegativeBalanceException extends Exception {
   public NegativeBalanceException(String message) {
      super(message);
   }
}

class Test {
   public static void main(String[] args) {
      try {
         double balance = -500;
         if (balance < 0) {
            throw new NegativeBalanceException("Balance cannot be
negative");
         }
      } catch (NegativeBalanceException e) {
         System.out.println("Error: " + e.getMessage());
      }
   }
}
```

Answer

Error: Balance cannot be negative

Status : Correct   *Marks : 1/1*

10. Which of the following is true about custom exceptions?

Answer

Custom exceptions must extend either Exception or RuntimeException

11. What will be the output of the following code?

```
class MyException extends Exception {
    public MyException() {
        super("Default Exception Message");
    }
}

class Test {
    public static void main(String[] args) {
        try {
            throw new MyException();
        } catch (MyException e) {
            System.out.println(e.getMessage());
        }
    }
}
```

Answer

Default Exception Message

Status : Correct   *Marks : 1/1*

12. what is the output of the following code?

```
class MyException extends Exception {
    public MyException(String message) {
        super(message);
    }
}

class Test {
    static void check() throws MyException {
        throw new MyException("Custom Exception Occurred");
    }
```

```java
    public static void main(String[] args) {
        try {
            check();
        } catch (Exception e) {
            System.out.println(e.getMessage());
        }
    }
}
```

Answer

Custom Exception Occurred

Status : Correct   *Marks : 1/1*

13. What will be the output for the following code?

```java
import java.io.*;

class TemperatureTooHighException extends Exception {
    public TemperatureTooHighException(String message) {
        super(message);
    }
}

class Test {
    public static void main(String[] args) {
        try {
            int temperature = 110;
            if (temperature > 100) {
                throw new TemperatureTooHighException("Temperature too
high");
            }
        } catch (TemperatureTooHighException e) {
            System.out.println(e.getMessage());
        }
    }
}
```

Answer

Temperature too high

Status : Correct

Marks : 1/1

14. What will be the output for the following code?

```java
class InvalidVotingAgeException extends Exception {
   public InvalidVotingAgeException(String message) {
      super(message);
   }
}

class Test {
   public static void main(String[] args) {
      try {
         int age = 15;
         if (age < 18) {
            throw new InvalidVotingAgeException("You are not eligible to vote");
         }
         System.out.println("Eligible to vote");
      } catch (InvalidVotingAgeException e) {
         System.out.println(e.getMessage());
      }
   }
}
```

Answer

You are not eligible to vote

Status : Correct

Marks : 1/1

15. What will be the output for the following code?

```java
class InvalidUsernameException extends Exception {
   public InvalidUsernameException(String message) {
      super(message);
   }
}
```

```java
class Test {
    public static void main(String[] args) {
        try {
            String username = "abc";
            if (username.length() < 5) {
                throw new InvalidUsernameException("Username must be at
least 5 characters long");
            }
        } catch (InvalidUsernameException e) {
            System.out.println(e.getMessage());
        }
    }
}
```

Answer

Username must be at least 5 characters long

Status : Correct   *Marks : 1/1*
